

Non Concussive Time Flow Taps

Product Code: NCTAP

Chrome plated wash basin tap with time flow. Supplied in singles or pairs the taps are ideal for schools, nurseries, nursing homes, hospitals, and unsupervised areas. The 10 second operation reduces the risk of water being wasted but allows suitable time for washing and then rinsing hands. The vandal resistant operation works when the button is released stopping the button from being jammed open and the tap being left running. A 3 litre per minute flow limiter is fitted into the aerator to help save water.

Delivery

Typically 1 to 2 working days

Tech Spec

Max Inlet Pressure 5 Bar
Min Inlet Pressure 0.1 Bar
Timed flow (standard) approx. 10 seconds at 1 Bar
½ inch standard valve and inlet
WRAS approved
2 year's manufacturer's warranty

Aerator with 3 litre per minute flow limiter

To ensure the proper functioning and longevity of this unit, a Y-strainer must be installed as part of the water supply system. The Y-strainer is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer will result in the warranty being void.
