Stainless Steel Back To Wall Toilet

Product Code: ABTWP

Our stainless steel back to wall toilets offer unbeatable value for money. The minimalist design means that they can be seamlessly integrated into any junior school, secondary school, college or sixth form washroom, while the stainless steel construction makes them long-lasting, hygienic, and exceptionally easy to clean and maintain. They're also highly vandal resistant.

Floor mounted for stability, these stainless steel toilets are designed for use with a concealed cistern to help save space. As well as the polished contour seat, concealed floor fixing plate and horizontal P trap outlet, these toilets include a wide range of options for customisation - see the extras section for more details.

This stainless steel back to wall WC also meets the water saving requirements of both the British Standard and Water Supply (Water Fittings) Regulations 1999, meaning that they're not just easy on the wallet, but easy on the environment too.
