

Wall Recessed Bottle Filler

Product Code: RMBF

These stainless steel recessed bottle fillers take up minimal space in a room so offer small impact into classroom or corridor spaces. Designed to be recessed into the wall with a minimal projection from the wall.

Point of use bottle filling units help to promote the use of refillable water bottles to help combat the waste caused by single use plastic bottles.

Easy and quick to use the recessed bottle filling units are also vandal resistant and easy to clean.

Delivery

From stock 1 to 2 working days

To ensure the proper functioning and longevity of this unit, a Y-strainer must be installed as part of the water supply system. The Y-strainer is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer will result in the warranty being void
