# Wall Hung Water Station With Undershroud (Non-Chilled)

Product Code: WH-DFBFS

Shrouded drinking fountains are designed with busy school corridors in mind. The 1.6mm-thick stainless steel construction means it's rugged enough to withstand knocks and bumps, while the integral stainless steel shroud protects your pipework from damage. Despite its robust nature, the shroud access panel can also be easily removed for cleaning and maintenance purposes.

The integrated wall-fixing brackets allow you to fix these shrouded water drinking fountains to a wall at any height you desire, meaning they can accommodate pupils of all ages. The easy-press button operated bubbler tap and swan neck bottle filler tap is also fully approved by the Water Regulations Advisory Scheme.

### Delivery

Typically 1 to 3 working days

### Tech specs

Material: 1.6mm thick stainless steel (304 grade)
Width: 305mm
Depth (front to back): 350mm
Height (top to bottom): 245mm plus 75mm splashback
Waste fitting: 32mm
To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

### What is WRAS approval?

Many of our school drinking fountains are WRAS-approved - but what does that mean, exactly? WRAS approval is a way for manufacturers to demonstrate compliance with the Water Supply (Water Fittings) Regulations 1999.

These regulations concern the supply of drinking water and stipulate that it must be free from contaminants and supplied in a way that is not wasteful.

### Related products

We think you may also be interested in our shrouded bottle filling stations and floor-standing shrouded drinking fountains. If you want to protect your pipework but don't have much space, you could also opt for a recessed drinking fountain or bottle filling station.

Our drinking fountains also come in junior-height models. If you can't decide between a water fountain and bottle filler, you could go the whole hog with one of our combined drinking fountain and bottle filling stations.
