

## Nursery Stainless Steel Wash Trough

Product Code: NWT

Designed with nurseries and early years classrooms in mind, our nursery stainless steel wash trough helps make handwashing safe, easy, and accessible for young children. With a reduced projection of just 325mm, it allows smaller users to comfortably reach the taps without overstretching. The smooth, rounded front edge offers added protection against knocks and ensures a softer, child-friendly design.

Whether you're fitting out a single wash area or a larger space, choose from five length options (1200mm to 2400mm) to suit your layout. We'll position the tapholes according to your tap preferences, giving you flexibility with your setup. Tough, hygienic, and designed for daily use in high-traffic environments, this stainless steel wash trough is a practical and long-lasting solution for nurseries, reception classes, and early years washrooms.

- Compact 325mm projection
- Safer rounded front edge
- 5 lengths available: 1200–2400mm
- Bespoke taphole options
- Perfect for EYFS & KS1 settings
