Stainless Steel Close Coupled WC Suite

Product Code: ACC

Our stainless steel close coupled toilets come with an integrated cistern to help you save money and installation time. Operated via a pneumatic push button, the four litre cistern is built from corrosion-resistant stainless steel, which is renowned for its durability and resistance to vandalism. The WC pan itself is also constructed from stainless steel for ease of cleaning.

This close coupled toilet comes with a flush pipe connector and concealed floor plate, making for a simple and secure installation. The polished, contoured rim of this WC is ready to be used as a seat, but we also offer an additional hinged plastic seat and lid if desired.

We can also supply a Doc M kit, which can be used to convert this close coupled WC into a toilet for disabled users by extending the projection and raising the pan height; as such, this toilet can be used in schools that cater to children with special educational needs, or as a disabled toilet in any school. See the ‘extras’ for more information.

Delivery

From stock typically 1 to 2 working days

Tech specs
