KWC DVS Miranit 2 Person Wash Trough

Product Code: SOLX1200T

The Miranit trough sink is manufactured from resin-bonded mineral material offering a non-porous surface that withstands temperatures up to 80°C. Supplied as a 1200mm length with two single 35mm tap holes but also available in an 1800mm length with three single 35mm tap holes. The trough sinks combine style with practicality with a streamlined design without seams or joints.

The smooth nonporous surface is easy to clean and there are no joints or seams to trap dirt. Supplied with pre-drilled tap holes, 32mm waste with overflow and wall fixings these troughs offer an easy to install and easy to maintain two user wash trough for your school or college.

Delivery

In stock - 2 - 3 working days.

Tech specs

Material: Miranit resin bonded mineral material
Colours: Alpine White
Lengths: 1200mm (also available in 1800mm
Depth (front to back): 480mm
Height (top to bottom): 170mm
Waste fitting: 32mm with overflow
Tap holes: two single 35mm
Fixings: wall fixing bolts and rawl plugs (make sure these are suitable for your wall before use)

Extras

Complete the look of your modular trough sink with the following extras:

Taps
Time-flow taps
Lever-operated mixer taps
Infrared basin taps

Miscellaneous
Stainless steel deck or wall mounted soap dispensers
Paper towel dispensers in stainless steel

Installing a thermostatic water mixing valve will protect your users from scalding and ensure an agreeable hand-washing temperature. We would recommend a TMV3 for this purpose

MIRANIT products are crafted from a single mould without the use of adhesive seams or joints, resulting in a sleek, seamless finish. Known for their exceptional stability, elegant appearance, and long-lasting durability, these products feature a smooth, pore-free Gelcoat surface that is hygienic and easy to maintain. The name MIRANIT represents a robust composite material made of approximately 80% natural minerals—such as marble, sandstone, and quartz sand—and about 20% high-quality unsaturated polyester resin. Quartz, one of the hardest substances found in the earth's crust, contributes to the material's strength. When combined with the resin, the result is a highly stable, formable compound ideal for precision cast moulding.
