

Stainless Steel Shower Panel - Adjustable Temperature Time Flow

Product Code: SHPAN-AT

This wall mounted stainless steel shower panel has a self-closing manual mixing valve that lets you control the water temperature and automatically shuts off after each use to save water.

The strong design features a fixed, anti-ligature shower head that helps improve safety, making it ideal for places like schools, sports centres, hospitals and prisons. The manual mixer valve allows the user to adjust the temperature whilst the time flow operation ensures the shower switches off automatically to prevent water being wasted by leaving the shower to run continually.

Delivery

From stock, typically 1 to 2 working day

Tech Specs

Height: 1050mm.
Width: 200mm.
Projection: 140mm.
