

## Back To Wall Accessible Toilet

Product Code: DBTWT

Back to Wall Accessible WC Pan – Stainless Steel (Doc M Compliant). Designed specifically for disabled access toilet cubicles, our Back to Wall Accessible WC Pan offers durability, comfort, and full compliance with Doc M regulations. Manufactured from high-grade 1.5mm thick stainless steel, this shrouded pan provides exceptional resistance to vandalism, making it ideal for high-traffic and public-use environments such as schools, leisure centres, and transport hubs.

With an increased height of 480mm and projection of 700mm, it supports easier use for those with reduced mobility. The duct wall fixing allows for integration with a concealed cistern, while the pan's quick installation design includes two TORX-secured access panels for security and maintenance.

This unit is supplied without a seat as standard, but a black plastic seat can be added as an optional extra. When used without a seat, stainless steel blanking caps are included to seal the seat fixing holes for a clean finish.

Compatible with a 4-litre cistern thanks to its water-saving design, this WC pan is CE Marked and fully compliant with EN997 standards for 4L flush performance.

### Delivery
