## 316 Grade Wall Mounted Bottle Filler

Product Code: 316-WMBF

316 Grade stainless steel wall-mounted bottle fillers for schools. These wall-mounted bottle fillers provide a convenient and hygienic source of fresh drinking water, enabling pupils to easily refill their reusable water bottles throughout the day.

With growing awareness around the environmental impact of single-use plastics, there has never been a better time to encourage pupils to switch to refillable bottles. Made from 316-grade stainless steel, these bottle fillers offer outstanding corrosion resistance and durability—ideal for school environments, including those near coastal areas or in high-humidity locations.

The compact design features a recessed bottle filling area to help minimise splashing and reduce water on the floor, promoting safety and cleanliness. The simple push-button on/off valve is easy for pupils of all ages to use and shuts off immediately when released, preventing water waste.

### Delivery

From stock, usually 1 to 2 working days.

### Technical Specifications

Height: 545mm

Width: 350mm

Front to Back: 85mm

Bottle Aperture: 335mm x 125mm

WRAS-approved valve, outlet, fittings, and pipework

Keyhole slots for quick and simple installation

Supplied with 32mm waste fitting and flexible waste pipe

Note: To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

### Related Products

[304-grade wall mounted bottle fillers](#) are also available, along with an extensive range of robust bottle fillers and drinking fountains suitable for school environments.
