Drinking Water Bottle Filling Trough - Single

Product Code: MBFT-1

Provide students, staff, and visitors with a simple and hygienic way to refill reusable bottles. This wall-mounted single-user bottle filling trough is designed to support healthier hydration habits while helping schools cut down on plastic waste and unnecessary water usage.

Product Description

Built from high-grade stainless steel, this compact single user bottle filling unit is ideal for corridors, changing rooms, dining areas, and multi-use school spaces where durability and cleanliness are essential. The brushed finish reduces visible marks, making it easy to maintain in busy environments.

An on/off push-button tap gives users complete control over water flow, which helps minimise waste compared with traditional timed-flow taps. This not only saves water but also reduces associated utility costs—an important consideration for school budgets.

The trough includes a 38mm waste outlet for quick drainage and can be installed at a height that suits all age groups, including wheelchair users. Its slim, wall-mounted design keeps floor space clear while providing a dependable refill point that encourages pupils to use refillable water bottles instead of disposable plastics.

Delivery

Standard delivery available to mainland UK schools of 1 to 2 working days
Units are supplied well-protected to prevent damage during transit

Tech Specs

Material: Corrosion-resistant stainless steel

Finish: Brushed satin

Tap: Manual on/off push-button - WRAS approved

Mounting: Wall-mounted

Location: Indoor or sheltered outdoor use

Drain: Integrated 38mm waste outlet

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.
