GRP Wall Mounted Bottle Filler (Non-Chilled)

Product Code: GRP-WMBF

Wall Mounted GRP Bottle Filling Station for Schools

Product Code: GRP-WMBF

Providing pupils and staff with convenient access to drinking water is an important consideration when planning school facilities. This wall mounted GRP bottle filling station offers a practical way to introduce dedicated refill points in classrooms, corridors, dining areas and other suitable locations.

The unit is manufactured from 6mm thick glass reinforced plastic (GRP) with a smooth white gelcoat finish. Its rounded corners and gently sloping sides provide a neat, streamlined appearance, making it an attractive alternative to conventional stainless steel bottle fillers.

Designed to accommodate most reusable drinking water bottles up to 750ml, the generous filling aperture makes it easy for pupils and staff to refill their bottles throughout the school day.

The hand or forearm operated push button valve provides simple on/off control, helping to avoid unnecessary water wastage.

Delivery

Standard Delivery: 1–2 Working Days

Key Features and Benefits

Designed for School Drinking Water Facilities

Provides a dedicated drinking water refill point to encourage pupils and staff to use reusable bottles, helping schools reduce their reliance on single-use plastic bottles.

Rounded GRP Construction

The 6mm thick GRP body incorporates smooth rounded corners and gently sloping sides, with a white gelcoat surface that is easy to wipe clean as part of routine school maintenance.

Simple Push Button Operation

The hand or forearm operated filling valve allows users to start and stop the water flow without having to hold down a button throughout filling.

Space-Saving Wall Mounted Installation

With an overall projection of just 90mm, the compact unit can be installed against a suitable wall without occupying floor space.

Suitable for Everyday School Use

The durable moulded construction and straightforward operation make the bottle filler suitable for regular use in primary schools, secondary schools, colleges and other educational buildings.

What's Included

- White gelcoat GRP wall mounted bottle filling station.
- Hand or forearm operated push button filling valve.
- 32mm waste fitting.
- Flexible waste pipe.
- Wall fixing plate with bolts and washers to attach bottle filler to wall fixing plate.

Dimensions

- Overall Height: 566mm
- Overall Width: 366mm
- Overall Projection: 90mm
- Bottle Filling Aperture: 335mm high x 125mm wide
- Material: 6mm thick GRP
- Finish: White gelcoat
- Corner Radius: 20mm

All dimensions are approximate.

Installation Note: A Y-strainer or suitable water filter must be fitted to the incoming water supply to protect the valve from debris. Failure to install one will invalidate the warranty.

Water Regulations: Kiwa REG4 approval pending.

For Use With

- Reusable school drinking water bottles.
- Remote water chillers where chilled drinking water is required.
- Suitable Y-strainers or incoming water filters.
- School drinking water and hydration facilities.

Extras

- Y strainer
- Inline water filter
